Ramazan DOĞAN
Frontend Developer

I'm computer engineer student who is excited, hardworking and loves to learn new things. I'm trying to specialize in React and improving myself in TailwindCss, Css and Javascript. I always try and learn to new libraries and tools that I see. I know how to be successful by being passionate about learning new things. My interest in blogging and SEO taught me how to find the right information and fix mistakes.

- I can be good qualified developer If i can start a career.

Projects

- github.com/ramazandogna

I didn't deploy my all projects while i was learning write code. So i shared all projects only from my github account.

- https://react-portfoilo-demo.netlify.app/

A basic portfolio website created by me.

Why me?

I'm very obsessed to learn new things about my career;
1. I started and finished to learn "React" from BTK in early 2022.
2. I learnt TailwindCSS then i discovered to using TailwindCSS with postCSS. (with apply methods)
3. I started to Turkcell Gelecegi Yazanlar Course in end of 2022 and i learnt Context API very well.
4. I started to learn Dr. Angel Yu Fullstack Web Development course in 2023 and i learnt typography and color design ethics very well and im continuing..
